OEM/ODM for premium brands and distributors

With 12 years' experience supplying screen protectors

OEM/ODM services for worldwide export and timely release of new products
 VIPO has been engaged in the OEM/ODM production of screen protectors for 12 years. Our services are preferred by international clients throughout the US, Europe, Japan, South Korea and other countries and regions. Constantly on top of the latest models and materials, our 35-member R&D team launches new products in time with the development of new devices, in some cases even before their announced release date. This ensures that our clients get the first market share of sales. Our skilled engineers also design precise new molds for each device

Monthly output of over 10 million units
 To ensure precise and efficient manufacturing of your orders, we've equipped our ISO 9001:2008-certified and Walmart-audited factory with imported die-cutting machines, and all of our products bear RoHS and REACH marks. To date, we have not received a single complaint about the quality of our goods. And with 300 employees, we are able to turn out more than 10 million units each month to accommodate your volume orders. We can complete orders in as fast as 7 days.

Competitive prices and the best screen protection solutions
 With such large facilities, we can offer one-stop, low-cost, flexible and efficient services for your screen protector needs. To find out how we can help increase the value of your brand and business, contact us today.

worked at leading

If feature-packed wearable devices are what you’re looking for, then we can satisfy your needs. Our 150 engineers utilize their experience from working at Huawei and MediaTek to create models like the products shown here.

To keep up with market trends, we invest 10 percent of our annual sales in our R&D department. This, along with creative collaboration with specialists at the Northeastern University in mainland China, enables us to develop three new products monthly. You can find our smart watches, GPS sports trackers and GPS bracelets sold under our Appscomm in-house brand.

Buyers in Europe and the US trust the quality of our goods because our 15 QC technicians run strict tests on each unit at our two factories. Put our 800-member team to work on your next project by calling us now.

Global Sources supplier rankings

★★★★★

Suppliers are ranked using a 6-star ranking system. Companies with a higher star ranking provide more business information and verification reports on their Global Sources online homepages. Suppliers rated 5 or 6 stars have a Credit Check report from First Advantage or Sino-Trust and a Supplier Capability Assessment report provided by Bureau Veritas online. The rankings are correct at the time of publication and may be subject to change.

NOTE TO READERS: All prices quoted in this magazine are in US dollars, unless otherwise specified. FOB prices were provided by the companies interviewed only as reference prices at the time of the interview and may have changed. Readers seeking firm quotes on products mentioned in this magazine should contact the manufacturers/traders directly. All product images are provided by the companies interviewed and are for reference purposes only. Those product images featuring products with trademarks, brand names or logos are not intended for sale. Products that are not the specific topics of editorial articles are shown for illustrative and/or demonstrative purposes only. We, our affiliates, and our affiliates’ respective directors, officers, employees, representatives, agents or contractors do not accept and will not have any responsibility or liability for product images (or any part thereof) which infringe on any intellectual property or other rights of a third party.

USB Type-C charging cables

Lightning cables for iPhone, iPod and iPad,
2.8mm, 3.5mm and flat cables available

We reinvest over \$10 million annually to boost our R&D power

10 new designs every week from an MFi-licensed supplier

Product development is at the top of our list. That's why we funnel over \$10 million annually towards R&D ventures. With such a big budget, our 40 engineers are able to create four unique power supplies monthly and complete 10 new designs every week. And they're ready to give your ODM projects the same attention to detail and efficiency. In fact, they can have a prototype customized to your specifications in just seven days.

We have the production capacity to ship more than 1 million mobile phone cases, 4 million chargers and a large quantity of power banks worldwide in a single month. About 80 percent of these products go to 150 buyers in Europe, the Americas and Asia, resulting in an annual turnover of almost \$50 million. These figures demonstrate that we're actively ready to support your market growth. Our latest chargers and other products are on display at our Global Sources Online showroom. Log on today to find out more.

Dual-USB power banks

stylish, portable

Models can blend well beside a mobile device, are less bulky and boast fancy designs.

Power banks are becoming a necessity as more energy-consuming functions continue to penetrate smartphones and other mobile devices. China makers are banking on this need in their latest dual-port power banks, with most models blending well with devices by having fancy shapes and cases. One version, for example, resembles a cassette tape, while another uses a stylish leather case. Some models can fit in a pocket, making them easy to carry anywhere. The smallest power bank in this selection weighs just 70g.

With dual-port capability, power banks can charge two devices simultaneously at speeds of 2A at most. Some units deviate from the conventions by having a PV panel or a wireless charger. Capacity remains a key consideration with units yielding up to 13,000mAh. Meanwhile, protection against short-circuit, overcharge and -discharge is a staple.

Here are 10 recently released models handpicked by our Market Analysts for representing the current trends in dual-USB power banks.

Rubber-coated

Dongguan Arun Industrial Co. Ltd's model Y303 power bank packs 6,000mAh. The two-port unit is coated in rubber. It has four LED indicators and a power switch button. The unit is available in black, silver, blue, green and other colors per buyer's request. It measures 61x23x90mm and weighs 176g. FOB price is \$7.27 with an MOQ of 3,000 units.

CONTACT SUPPLIER

Smart chip

With two USB 2.0 ports, Hame Technology Co. Ltd's model H8 power bank can charge two devices at the same time. The 13,000mAh model adopts a Li-ion battery and a smart chip that controls automatically the current output. It also comes with a Micro-USB port to refill its own battery, which takes 14 hours. Conversion rate is about 93.4 percent. Maximum output is 5V/3A. The model has four LED indicators. Recharge cycle lasts 500 times.

CONTACT SUPPLIER

Leather case

The model OT-PW205 power bank from Outtos Industrial Co. Ltd uses a leather case for a more appealing look. The model has 12,000mAh capacity and adopts a smart IC chip. It utilizes advanced Quick Charge 2.0 technology, enabling it to refill devices efficiently. The unit has four LED indicators to determine the battery status. The 229g power bank measures 144x76x15mm. Available colors are black, white, pink and blue. FOB price is \$8 with a minimum order of 500 units.

CONTACT SUPPLIER

Fire-resistant

Housed in a fire-resistant case, the model S20 power bank from Shenzhen Cager Digital Technology Co. Ltd protects devices against short-circuit, overcharge and -discharge. It offers 12,000mAh capacity at a recharging speed of 2A. The two-port model has 5VDC/1A and 5VDC/2.1A output. A Li-polymer battery is adopted. The unit measures 18x76x146mm and weighs 235g. FOB price is \$12 to \$14 with an MOQ of 2,000 units. Lead time is 20 days.

CONTACT SUPPLIER

Uses PV panel

A solar charger power bank with two ports, the 901 model from Shenzhen Keyuantai Industry Co. Ltd uses a PV panel to refill a device's battery directly from the sunlight. The model has 5V/0.3A input for the PV panel and 5V/2A for the Li-polymer battery. Each of the model's USB port uses a smart IC and suits nearly all brands of smartphones and tablets. The 7,000mAh power bank features a rubber oil finish. The unit refills its own battery in 4 to 7 hours, with more than 800 recharge cycles.

CONTACT SUPPLIER

Resembles cassette tape

Resembling a cassette tape, the model M001 power bank from Shenzhen Remax Co. Ltd offers 10,000mAh capacity. Input is 5V/1A while output is 5V/1.2A. The model comes with a 1-year warranty. It meets CE, FCC and RoHS standards. The power bank is available in different colors. FOB price is \$8.70 with an MOQ of 100 units.

Making A/V products for global buyers for 19 years

BT-405
Bluetooth speakers

Assisting recognized industry leaders

We have been manufacturing A/V products since 1996. Sanyo is just one of the recognized market leaders from North America and Southeast Asia that has benefited from our extensive knowledge of the industry. Work with us and take advantage of our design and production strengths.

Monthly output of over 500,000 units

To ensure precise and efficient manufacturing of your orders, we've equipped our ISO 9001:2000-certified factory with imported SMT machines, AI-insertion machines and COG bonders. And with 6,000 employees and 45 production lines, we are able to turn out more than 500,000 CE-certified units each month to accommodate your volume orders.

R&D support from 100 engineers

We're always on top of the latest trends in portable entertainment devices, thanks to our team of 100 engineers. Each month, they add up to three new products to our selection of Bluetooth® speakers, portable CD/VCD/DVD players, radio receivers, home DVD players and mini component systems. These items can be customized to meet consumer preferences in your market.

Learn more about what a 19-year industry veteran like us can do for you. Visit our website today.

Charges wirelessly

The model S40 power bank from Shenzhen Volpower Technology Co. Ltd is compatible with Qi-enabled devices for wireless charging. It also has two USB ports for users who want to plug in their devices the conventional way. The unit boasts 1,000 recharge cycles and has a capacity of 10,000mAh. It supports tablet PCs, mobile phones, digital cameras, MP3 and MP4 players, and 12V car emergency jump starters. Product dimensions are 185x82x26mm. FOB price is \$60 while MOQ is 100 units.

[CONTACT SUPPLIER](#)

Lightweight

Winky Industry Co. Ltd's S17 model is a dual USB port power bank with 2,600mAh capacity. It is convenient to carry, measuring 92.2x21.7mm and weighing just 70g. The model is made of ABS and PC. It meets CE, RoHS and FCC standards. Available colors are blue, black and red. The model suits the iPhone 6 Plus and Samsung Note 4. FOB price is \$1.99 to \$5.99 with a minimum order of 100 units. Lead time is 7 days.

Mark II

The Next Generation of Professional Headsets

Welcome to the next generation of professional headsets from the world-renowned communication headset maker.

Thanks to technological advancements of electro-acoustics and mechanical engineering, Accutone® is proud to introduce the Mark II revamp of two of the most popular series from our business lineup.

310|MK II is a lightweight, elegantly-designed headset with a pair of 28mm loudspeakers and Gen2 noise-cancelling microphone design. Rated as the most versatile headset for professionals and office executives, the 310 has been upgraded with features like dual-mic DeepOcean capability and rotatable/detachable leatherette ear-pieces.

710|MK II is the enhanced version of the siblings, with stronger durability, highly-comfortable design and eye-catching appearance. With a readjusted axis to the speaker chamber, the 710 diverts much of the pressure from the headband, making it more susceptible to heavy usage. Also equipped with a Gen2 noise-cancelling microphone, the 710 comes with a pair of 40mm wideband speakers as well as DeepOcean capability.

Both 310 and 710 come in a single-ear monaural version as well as with a QD connector for pairing with the wide variety of bottom cables used with telephone and computer via USB port.

Contact us today for more details.

Global Sources supplier rankings

★★★★★★
Suppliers are ranked using a 6-star ranking system. Companies with a higher star ranking provide more business information and verification reports on their Global Sources online homepages. Suppliers rated 5 or 6 stars have a Credit Check report from First Advantage or Sino-Trust and a Supplier Capability Assessment report provided by Bureau Veritas online. The rankings are correct at the time of publication and may be subject to change.

NEW

Up to six new items released every month

And a monthly capacity of 300,000 smartwatches and smartphones

More than 20 patented items

We are a high-tech manufacturer and exporter of smartwatches, mobile phones and tablet PCs, committed to offering OEM and ODM services for our partners worldwide. What’s more, our more than 30 senior R&D engineers develop up to six new models monthly, allowing you to keep up with the latest market trends. Our products hold 20 patents in mainland China and up to 98 percent of our mobile phones use private molds.

Up to 300,000 pieces every month

Our 6,000m² factory houses 18 fully automated and semi-automated assembly lines, high-speed automatic SMT machines, fully insulated silkscreen printing workshops, an 8-hour aging test room and a range of QC equipment, including LCD switch testers. Backed with such an advanced manufacturing capability, we can easily produce 300,000 pieces monthly. Our CE-, RoHS- and REACH-compliant products are sure to give you an edge in your markets.

Please feel free to contact us and see how we can make your business grow.

Buyer's Guide

[continued from page 45 »](#)

Selecting power bank manufacturers in China

A quick search on any major B2B supplier directory reveals thousands of suppliers selling power banks for cellphones and related products. Yet, buyers that consider pricing as their primary supplier selection criteria are likely to find themselves in hot water. In this article, we explain what really matters when sourcing power banks, and what overseas buyers must know about technical specifications, product standards and transportation restrictions.

Important factors when selecting a power bank & battery manufacturer

As with the electronics industry in general, the power banks industry is largely concentrated in Shenzhen, a major city in China’s southern Guangdong province. Worth mentioning is that there are a number of relevant manufacturers located in Ningbo and a few other cities in Zhejiang province.

As we conducted extensive research on the power bank industry in 2014, we found that far from all power bank suppliers were actual manufacturers of the product. As this is a common situation in many industries, and not just for power banks, it certainly did not come as a surprise. That said, we still find it important to be brought up in this article.

What we found in 2014 was that a large percentage of power bank suppliers are trading power banks made originally for the domestic China market. As any experienced buyer in the electronics industry knows, such products are generally noncompliant with European, US and Australian safety standards. Such items, which may not even be made in compliance with local regulations, may lack overheating and overcharge protection – all of which are part of the regulatory scope in the mentioned markets. As a [press release from TÜV Rheinland](#) reveals, there has been numerous incidents inside, and even outside, mainland China involving power banks.

The point here is that not any supplier is good enough, and importers are wise not to put pricing first. Obviously, a system that is compliant with strict safety standards is more expensive to produce than one that is not, which also shows on the quotation. As such, importers must limit their supplier selection to those that are not only manufacturing the power banks “in-house,” but can show an extensive compliance track record and an applied quality management system. Here is a brief summary of the factors that matter:

Factor	Explanation
Manufacturer or trading company	With “trading company,” we refer to a group that owns no production facilities of its own, nor is part of a larger group, which owns the production facilities. Technical expertise is critical in this industry, and traders rarely possess such insights to be considered reliable. While buying from trading companies sometimes makes sense, I cannot come up with a single good reason when importing power banks or other energy related products.
Compliance track record	A test report and/or product certificate is only valid for the specific SKU mentioned in the document. A production facility as a whole cannot be “certified” or considered to be “compliant.” Suppliers that have no previous documentation proving that they have manufactured power banks in compliance with the regulations in your country are in most cases not even capable to do so.
Quality management system	A Quality Management System or QMS is applied to track and manage defective items throughout the production process. Such systems are especially important in the electronics industry where defects can easily multiply if not detected early in the process. Considering the risks involved for consumers using defective electronic products, a QMS system is a key factor when selecting a power bank manufacturer.

Product Specifications

As with most technical products, the pricing of a power bank depends entirely on its specifications. There is no general definition of “good quality,” and price figures differ completely between various specifications. Thus, importers must ensure that they are comparing the right technical details when sourcing power bank manufacturers in China. This holds true

regardless of whether your company intends to purchase an OEM or ODM product. Here are general specifications that you must keep track of.

Cell type	Samsung Li-ion battery	Connector/s	2xUSB 2.0
Capacity	4,000mAh	Socket	EU
Input	5.0V±0.2/1A	Display	None
Output	5.0V±0.2/1A	Protection	Overcharge, shor-circuit
Efficiency	90±2 percent	Standards/directives	REACH, LVD, EMC, IEC 62133, IEC 60950-1 and UL 1642
Life cycle	≥500 times	Case material	Aluminum alloy, ABS
Working temperature	-5 to 55 C	Weight	110g
Charging time	5 hours	Dimensions	23×23×103mm

Standards & regulations

Electronics and energy-related products, including power banks, are regulated in most developed markets. Some regulations and directives apply indirectly to power banks, in the sense that they apply to all electronics. Such regulations include FCC Part 15 in the US, and the Low Voltage Directive and the EMC Directive in the EU.

Certain standards, for some of which compliance is voluntary yet highly recommended, apply specifically to batteries and related energy products. These standards are:

- IEC 62133
- IEC 60950-1
- UL 1642

As has already been mentioned in this article, far from all China manufacturers are able to ensure compliance with neither technical standards nor foreign regulations. As this shall not be taken for granted, a proper document verification is critical prior to selecting a power bank manufacturer in China, or anywhere else for that matter. What importers must also note is that a product certificate, and its technical support documentation, is only valid for the listed SKUs. The supplier as a whole cannot be considered as compliant, but only the tested product. Thus, buyers must not only verify if their intended power bank manufacturer is compliant, but also if the very SKUs that they intend to purchase is so.

In case your company plans to purchase an SKU that is not already certified as compliant, all is not lost. A supplier with

the technical expertise and experience can, by redesign and using high-quality components, ensure compliance and then submit a sample for testing. Compliance testing can take place within China, as there are many [international testing and certification companies](#) present, with accreditation for product trial.

Labeling requirements

In addition to the regulations and standards mentioned above, labeling requirements for both the product unit and its packaging may also apply, depending on the target market. However, ensuring compliance with labeling requirements is a matter of providing the right graphical files although buyers shall refrain from making assumptions, including assuming that a supplier is perfectly aware of the labeling requirements in your market.

Transportation restrictions

As of Jan. 1, 2015, new [air transportation regulations](#) apply to lithium batteries, including products that contain such batteries internally, are put in place by the International Air Transport Association or IATA. This set of regulations apply differently depending on the type of battery and its output power. However, the scope of regulations includes the following:

- Export packaging: All batteries must be separated and packed individually with plastic wrapping and a foam divider.
- Warning labels: A warning label sticker of the appropriate type and size must be attached to each carton.
- Documentation: Additional documentation, attached to the airway bill, containing handling instructions and contact information of the seller.

Gaining experience from similar battery transportation restrictions, we have found that many small suppliers are completely unaware of said restrictions, and offer their buyers little to no support for ensuring compliance. This has not only been the case for energy-related products, but even wristwatches. However, these situations almost occur exclusively when importers select minor traders, which essentially stem from the idea that all suppliers are equal and that the only difference is the pricing. With the IATA regulations in place, importers just cannot afford to gamble.

Fredrik Grönkvist is the co-founder of ScandinAsian Enterprise in Shanghai. Since 2010, he and his team have helped hundreds of companies worldwide, primarily in the EU and US, to develop and manufacture products in China. He is also the main contributor on [www.chinainportal.com](#), a leading knowledge base for small- to medium-sized enterprises importing from Asia. For further questions, you can contact him on [www.chinainportal.com/contact-us/](#).

Metallic headset adopts protein leather pads
CONTACT SUPPLIER

Dongguan Uiisii Electronics Co. Ltd (mainland China)

Product details

Model: HM8

The HM8 model from Dongguan Uiisii Electronics Co. Ltd is a sports headset that uses protein leather ear pads for a comfortable fit. The headset has a metallic finish and is fitted with a 12mm speaker. Frequency ranges from 20 to 20,000Hz. The model adopts a 3.5mm stereo plug that suits the iPhone, iPod and iPad. It comes with a 1.2m cable.

Dongguan Uiisii’s major customers include Wal-Mart, LG, Vivo and YCA. With a 10,000sqm factory, the company turns out 300,000 to 350,000 units a month.

Supplier profile

Year established: 2008
Export markets: Asia, Americas, Western Europe
Annual sales: \$15 million to \$20 million
Total staff: 250 to 299

Sports headset bears IPX4 sweat-resistance rating
CONTACT SUPPLIER

Gold Fingers Technology Co. Ltd (mainland China)

Product details

Model: BTH06
MOQ: 3,000 units
Lead time: 15 to 25 days

Gold Fingers Technology Co. Ltd’s model BTH06 sports headset bears an IPX4 sweat-resistance rating, which makes it fit for use even while working out. The model runs on a 70mAh battery, yielding 4.5 hours talking and 175 hours standby times. Charging takes one to two hours. Working distance is 10m. The model measures 40x24x33.5mm and weighs 16.5g.

Amazon, Apple, Big Lots and Trust are some of Gold Fingers’ major clients.

Supplier profile

Year established: 2003
Export markets: Asia, Americas, Europe, Middle East/Africa, Australia
Export products: Bluetooth speakers and headsets, audio devices
Annual sales: \$9 million to \$10 million
Total staff: 450 to 499

Smart watch functions as pedometer, notifications hub

CONTACT SUPPLIER

Guangdong Appscomm Co. Ltd (mainland China)

Product details

Model:	W01
Launched / upgraded:	August 2015
MOQ:	1,000 units
Lead time:	25 days
Certification:	CE

Guangdong Appscomm Co. Ltd’s model W01 smart watch is designed with pedometer, sleep monitor, events calendar and alarm clock functions. As a notifications hub, the model alerts the user of an incoming call and text message, or pending notifications on social media sites. The smart watch uses a 0.49in OLED screen in 64x32 pixels. The Bluetooth 4.0-based model can synchronize data with the iPhone or Android phones. When paired with an app, the smart watch allows the user to set sports target and monitor progress on a daily, weekly or monthly basis.

Guangdong Appscomm has a 12,000sqm factory with six production lines.

Use third-party verified tools for more confidence and peace of mind when finding suppliers!

When top buyers like you source online, you want to know whether suppliers:

- Are trustworthy, reliable and financially stable*
- Can meet your specific requirements for product manufacturing and delivery*
- Have potential to be long-term trading partners*

Global Sources has partnered with independent third-parties to provide you with tools that verify suppliers and help you make better sourcing decisions.

Credit Check:

- Confirms a supplier’s status as a legally registered business
- Together with Verified Business Registration Details, Credit Check assures transparent and authentic information online
- All facts and figures are gathered from government agencies by Dun & Bradstreet (D & B) and Experian — two of World’s most trusted business credit reporting providers

Supplier Capability Assessment:

- Confirms details about a supplier’s operations, production capabilities, QC processes and management through factory tours, management interviews and documentation reviews
- Offered through TÜV SÜD and Bureau Veritas, the world’s leading conformity assessment and certification services providers
- Plus, request your custom company and product inspections

We know you want to source from suppliers that have been verified by third-parties, and we have made it easier for you to find them. Visit GlobalSources.com to learn more today.

Year established: 2003
Export markets: Americas, Asia, Australia, Europe, Middle East/Africa
Annual sales: \$20 million to \$25 million
Total staff: 250 to 299
Certifications: CE, FCC, BQB, RoHS

World’s first modular smart watch

Blocks (UK)

Product details

Model: Blocks
Launched / upgraded: October 2015
Lead time: 30 days

A UK startup aims to up the game in wearables with the introduction of the world’s first modular smart watch—Blocks. Opening more room for customization, the device is loaded with a variety of modules that can be swapped out to suit the current needs of a wearer. Examples of such modules are GPS, motion controllers, and heart rate and blood oxygen sensors. Aside from playing with Blocks’ functions, a user can personalize its look by altering the screen. The smart watch does not stick to a single set of features, letting the user upgrade its functions or add batteries and SIM cards.

Blocks was designed by a London-based startup called Blocks Wearables.

Supplier profile

Year established: 2014
Export markets: US (60%), Europe (30%) others (10%)
Export products: Modular smart watches
Total staff: 32

How much value can you get from “one-row”?

If you're tired of looking at dozens of pages of search results, try Global Sources' "one-row" search results.

Our objective is to help you quickly identify suppliers who have the products and capabilities you need.

In just one row, you can quickly get more information on various aspects of the suppliers background and qualifications. You can also easily expand the row to see as many as 46 relevant products.

To get started, visit GlobalSources.com today!

Simplify your
supplier search now!

Buyer Demand Trends

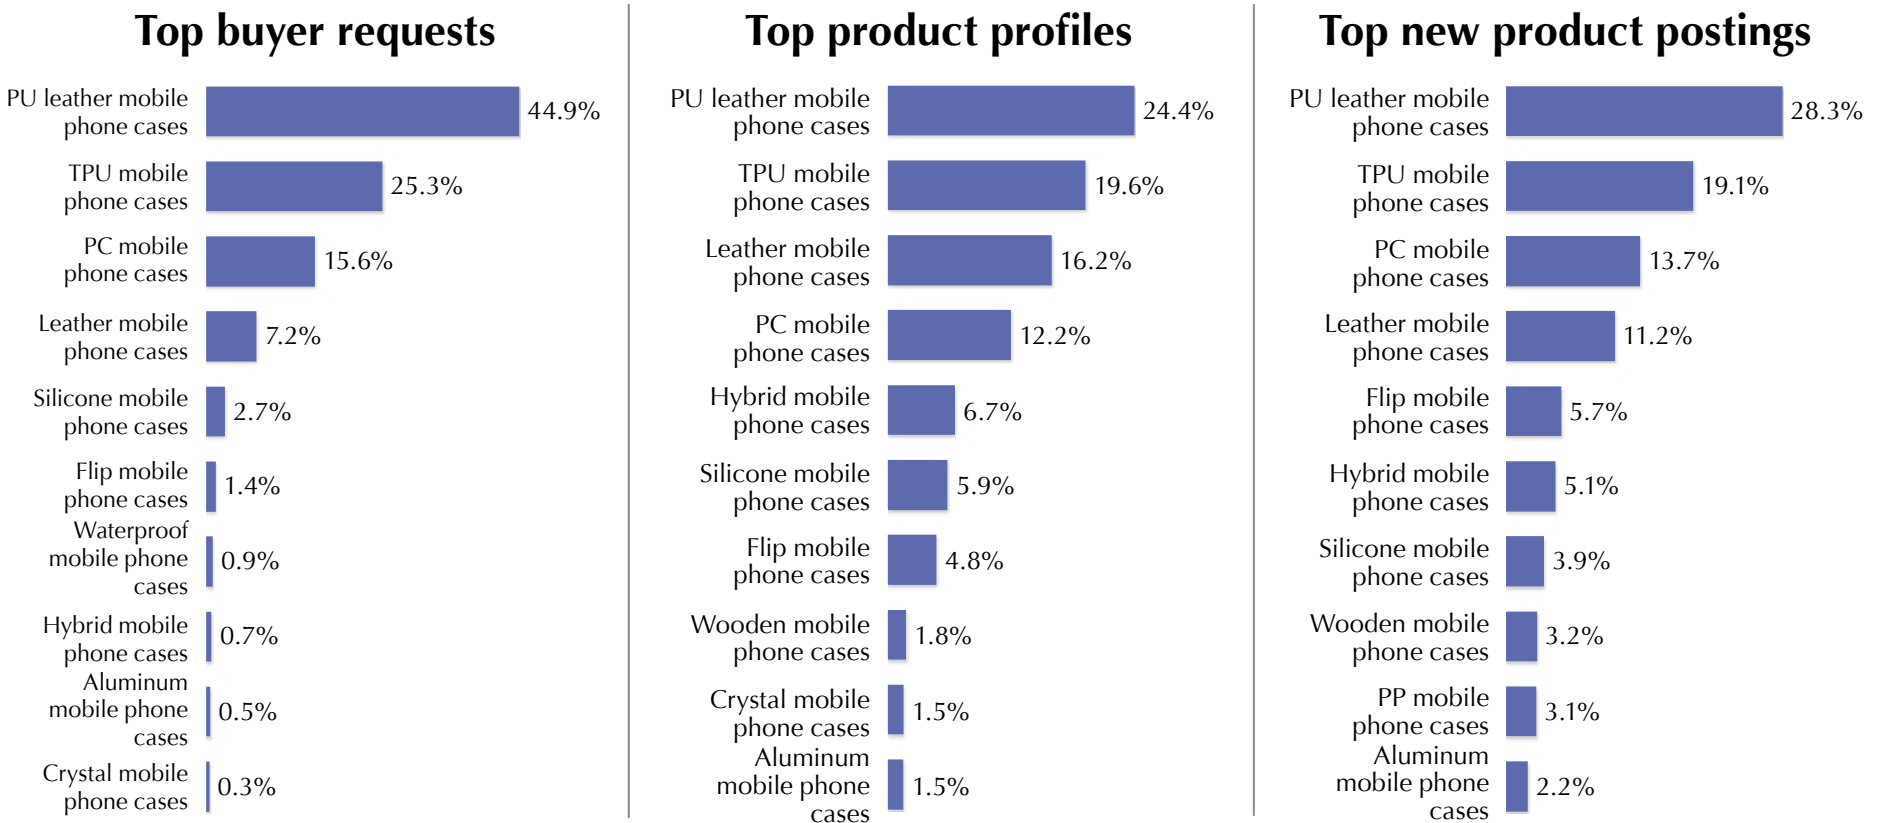

Online buyer and supplier activity in the featured product group on GlobalSources.com

Mobile phone cases

Buyer demand trends are taken from buyer and supplier activity in the featured product group on GlobalSources.com in the month preceding publication of this magazine.

- **Buyer requests** track total inquiries from our independently verified worldwide community of more than 1 million buyers.
- **Product profiles** represent the total number of unique products available from export-ready suppliers in our easily searchable catalogs.
- **New product postings** indicate the number of new product profiles added to our website by suppliers during the period.

For these and thousands of other categories, visit Global Sources online and sign up for Product Alerts to receive the latest supplier postings. Use the website’s Product Search function to find hundreds of products and send inquiries directly to verified exporters.

Stories on industry-shaping moves by leading brands

Microsoft's new Lumia doubles as portable PC

At its October event, Microsoft not only announced two new Lumia flagship Windows phones, but it also unveiled a capability that the market has not yet seen. The flagship phones, the [Lumia 950 and the big-screen 950XL](#), are what you would expect from the Lumia line – powerful back cameras, 4K video capability and a high-end Qualcomm chipset.

What was not expected from the event was the transformation of a smartphone into a true portable computer. Since the Lumia 950 and 950XL run what is essentially Windows 10, they have nearly full-feature versions of Microsoft Office and the Edge web browser.

The Lumia devices can be [linked to the Microsoft Display Dock](#), a small desktop USB hub, and can be used as a pint-size PC. The Dock can connect to a USB mouse and keyboard as well.

In some ways, this is a new front in the mobile office,

Image source: Microsoft

and is a clear challenge to devices such as Intel Compute Stick, the PC-in-a-dongle solution offered by the chip giant.

In addition, it is an ambitious move that is likely to be available on a wider variety of Windows 10 devices such as third-party phones and tablets.

Google Glass reborn as Project Aura

Google Glass may have captured the imagination, but it never quite captured the market.

Now, Google appears to be creating a new organization to develop the idea of an electronic eyewear despite closing down sales and production of the original Google Glass.

Newly christened “Project Aura – Glass and Beyond” will be overseen within Google, though according to a [report](#) from Business Insider, Nest CEO Tony Fadell will have a “high-level oversight” of the development team.

Google Glass

Fashion industry veteran Ivy Ross is also said to hold a high position in the group.

In addition, the company hired a number of engineers, developers and project managers from Amazon’s secretive product development arm Lab126, following layoffs there. Aside from the task of reviving Google Glass, Project Aura aims to speed up Google's efforts to develop similar wearable technology. The "Beyond" part may be geared toward developing a VR or an AR headset.

The BI report noted that the former head of Google Glass engineering, Adrian Wong, had been lured back from Facebook’s Oculus VR headset development team in June.

Will this mean that Google will be working on a VR headset like Oculus? Perhaps, but given its focus and history, a device like the Microsoft HoloLens AR headset may be more likely.

Ease the stresses of sourcing from China

When sourcing from China, do you aim to:

- Find competent and reliable exporters?
- Optimize your time by meeting suppliers that match your needs?
- Reduce time spent on arranging supplier meetings?

Private Sourcing Events do exactly that. Each product-specific event gives you the opportunity to meet face-to-face with up to 12 pre-selected and reliable exporters. Our dedicated team handles the work that would otherwise consume your time from screening vendors to organizing and managing your meeting day. This leaves you free to focus on what matters most — evaluating suppliers.

Simple and efficient. That is why 95 of the world's 100 most renowned retailers and brands work with Global Sources to streamline their sourcing process.

To join them, contact us at
PrivateSourcingEvents@globalsources.com.

“ In the past three years, Private Sourcing Events has connected us with 27 reliable suppliers. As a result of these partnerships, our revenue in 2011 increased by 5.4%. ”

Stories on industry-shaping moves by leading brands

[continued from page 105 »](#)

Is India's Micromax entering the US market?

Micromax is, at least according to IDC, the second-largest smartphone manufacturer by shipment volume in India. The company's phones are aimed at cost-conscious India consumers with price points ranging from \$50 to \$150.

Holding about 17 percent share in the India market, just behind Samsung's 23 percent, the company is now reportedly mulling expansion into the US market as well.

According to [TheInformation](#), Micromax is considering expanding into the US with its "Yu" branded handsets some time in 2016. Yu handsets, which use the Cyanogen-modified Android OS, sell for about \$200 in India. The 4G-enabled budget phones are powered by a Qualcomm Snapdragon processor and have 8GB internal storage that can be upgraded up to 32GB via a microSD card.

If the expansion pushes through, this would be a pretty big departure for the company. While \$200 off-contract phones are typically low-end in the US, they are aimed at customers for the midrange in India.

It will be interesting to see if the company can compete with comparable offerings from already familiar brands in the US, much less China manufacturers who sell phones at a similar price point.

Three tips for your China price requests

Here are three practical tips useful for most price requests in China, illustrated by recent projects.

1. Spend the time to specify your product in detail

Never assume that your supplier will know what you, as a buyer, want and expect. Requirement misunderstandings are the biggest source of problems between buyer and good suppliers. You, as a buyer, can reduce this by clarifying explicitly your requirement.

The following real case illustrates what to absolutely avoid.

A European SME making building equipment was looking for a specific electromechanical part to integrate in its products. This was a medium-complexity product based on standard technologies. But it requires some basic customization to match the buyer's requirement. We had identified and qualified several suppliers for our client. Armed with a drawing, functional requirements and a set of samples we issued price requests and secured initial pricing from all short-listed suppliers. It was now time for a factory visit with the client to review suppliers' abilities, technical solutions and final pricing.

Each of the suppliers raised an inconsistency between the functional requirement and sample. The torque at operating point specified on the drawings and the measured torque on the delivered sample differed. The conversation went like this:

At supplier 1:

Supplier: "We measured the torque on your sample and we see xxx Nm, but your drawing states yyy Nm. Which one should we follow?"

Buyer: "You should follow the drawing. This is the requirement and if we change this we will have to requalify the product and go through certification again."

At supplier 2:

Supplier: "We are not clear about your requirements. Our lab shows that the sample product has a torque of yyy Nm. Your stated requirements call for xxx Nm. We are not

sure why this is different. Which one do we need to design the product for?"

Buyer: "You measured the torque. This is the product we use in our system. Just follow the sample. We want the same results as the current part."

Do you notice any problem here? I bet you do. This is a time bomb that has started ticking.

First, the two suppliers will not provide the same product and it will be hard to compare prices.

Second, once production starts and the products come out of the factory, against which standard will they be tested and accepted or rejected?

This is an extreme case to highlight the problem, but this happens often. You will be wise to avoid this.

2. Qualify suppliers before or after receiving pricing

It is relatively easy to receive quotations from suppliers, but not all quotes are valid.

Quotes are only as good as what they include. There is no value in a low price for a product that is not compliant

Smart Sourcing

[continued from page 123 »](#)

with your requirement or from a supplier that cannot possibly make a compliant product.

When you request prices, before you can take any quote seriously, you will need to qualify the supplier: is this a serious supplier; do they understand what we require and quoted accordingly; are they not just trying to get my business at any cost and planning to negotiate lower standards or higher price later on?

Recently we searched for reliable suppliers of custom tempered glass for an industrial application. In parallel to our search, the client posted a quote request on the website mfg.com. The client received a very attractive quote from a supplier using the online platform. Prices were really competitive. Having some experience in China, the client consulted us regarding this and sent us quote and contacts for further qualification.

Negotiations happen all the time when dealing with China suppliers. It is always possible to manage it. But it takes times and energy.

Our sourcing engineer called the supplier's contact person on a mobile phone. The conversation was very short and vague, ending on: "Sorry, I cannot talk much now. I will call later." This conversation left a "funny feeling," something was not right. Following up, the sourcing engineer called the supplier's main number and asked to talk to the same contact person. The answer was: "Sorry, Sir, but this person no longer works for our company!"

The quote was a fake. The so-called contact was actually still able to access the mfg.com platform under its former company's name and get access to potential clients.

You better catch that as early as possible in the process. Low price is good but it can also mean trouble!

This is an extreme case again, but, more often than not, you will receive fantasy offers from unscrupulous sales people or supercompetitive proposal from very hungry traders that finally prove totally speculative.

However attractive an offer looks like, keep cool and

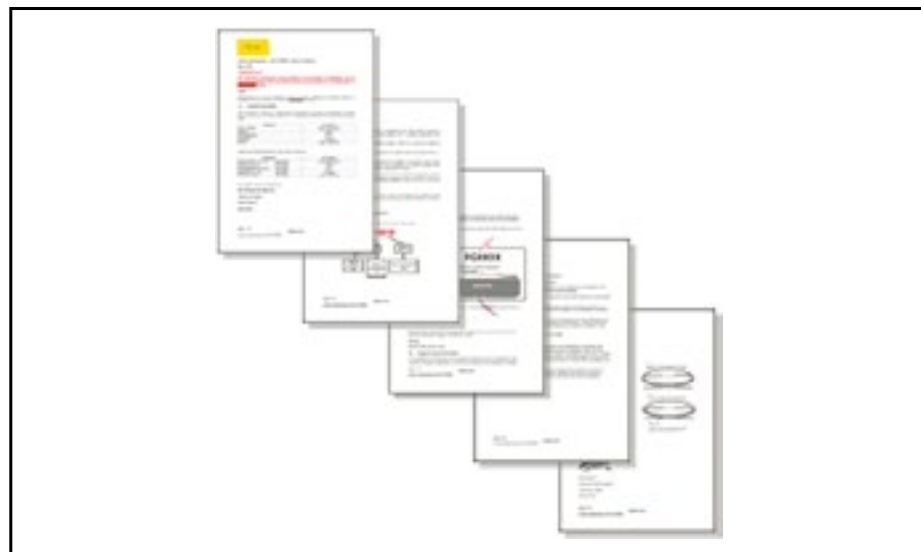

proceed with proper supplier qualification.

3. Keeping RFQ documents simple does not mean being shortchanged

Here is a real case where a simple but complete price request document helped us save money for our client later on in the sourcing process.

The request for pricing document

Eight paragraphs illustrated with drawings and photos. A complete document addressing technical specifications, production process requirement, packing and labeling requirements, golden sample process, contact address and delivery address, all in five pages.

Later in the process, the client rejected the first samples produced by the suppliers. A new set of samples was requested, of course. Realizing that it would incur additional expenses, the supplier explained that they would obviously make new samples but that they expected the client to pay for the transportation costs to Europe. You do not get anything if you do not ask, right?

Such negotiations happen all the time when dealing with China suppliers. It is always possible to manage it. But it takes times and energy.

In this case, though, the short price request document clearly indicated that this sample transportation was at the supplier's cost. This made the discussion easy to handle and we rapidly settle that this was the supplier's responsibility as it was clearly listed before the price quote.

Etienne Charlier is the founder of procurAsia and assists companies in sourcing industrial equipment and parts from China. He writes about sourcing trends and practical tips on his China Industrial Sourcing Blog. Etienne lives in Shanghai.

Product Index

This index will help you quickly find the products you are looking for. On the PDF version of this magazine, enter a page number in the top bar of your PDF Reader to go directly to that ad page. Return to this page anytime by clicking on Product Index at the top of each page.

Source smarter with Star Ranking

- Global Sources’ six-star ranking system helps you find the suppliers that match your needs
- Companies with more stars are generally larger and more experienced exporters
- Companies with more stars have paid more to get more exposure, and to provide you with more information to evaluate their capabilities
- Looking for large, well-established suppliers? Contact 4, 5 and 6-star suppliers
